Friday and Saturday, Dec. 2-3

Lillian Gish in

'The Scarlet Letter'

One of the big pictures of this or any other year! A screen masterpiece of amazing power and beauty! Never before have you seen a performance so sure and compelling as that of Lillian Gish in this greatest of love stories!

Expect the finest picture you ever witnessed when you see Lillian Gish in 'The Scarlet Letter!' You won't be disappointed.

Also Chapter 3: "THE COLLEGIANS"

Coming Next Wed. Dec. 7

"The Outlaws of Red River," with Tom Mix.

On account of Chautauqua there will be no show next Friday and Saturday.

Burglars Busy Tuesday Night

W. C. Hoskins' store was entered on Tuesday night and the money drawer of the register drawer was broken for some \$15 in change. Tools were taken from the shelves for the purpose and to judge by the assessment used considerable skill was exercised in the job. Entrance was gained by breaking a window, the rest of the store, exit being made possible by removing the bar from the back door. Mr. Hoskins' loss included a number of watches, safety razors, pocket knives and other articles, reaching a value in the neighborhood of \$75.00.

E. Latiff's pool room was also visited, entrance being gained by prying up a window in the rear. The till in this instance also yielded some \$15.00 and stock in the form of cigars, cigarettes and tobacco was taken. Const. Davis was notified and was promptly on the scene and hopes are entertained of landing the burglars.

W.C.L. Bake Sale On Saturday

A sale of home baking and produce will take place in W. C. Hoskins' store on Saturday afternoon, December 3rd: Pies, cakes, butter, buns, cream, chickens, etc., will be included in the offerings. As the proceeds will be used as relief in a case of sickness donations are requested and will be thankfully received. The sale will be conducted by the ladies of the Catholic Women's League.

Local and General

Chautauqua will be here on December 9, 10, 12 and 13.

Mrs. J. N. Beaubien is leaving for California shortly.

Howard Smith Jr. and Eli Hopkins left for Spokane on Thursday morning's train.

A. W. Jopling turned in a remarkable threshing record for this year of long straw. His outfit averaged slightly over 3,000 bushels per day for the actual time operated.

Considerably more care has been taken of change since Tuesday night. The pickings will be small in the line for some time.

B. M. Roberts assisted the Provincial police in locating clues by which to follow the till violators of Tuesday night.

Cars have made the trip from Calgary to Champion during the week but the drivers are not enthusiastic about the roads. The passing of other cars or sleighs is the most difficult part of the situation.

A meeting of the Curling Club will be held on Friday night in Joplings' store. This is the most important meeting of the year and all those interested, whether previously members of the club or not, are particularly urged to attend. Election of officers for the ensuing year, and making other arrangements for the season's play are included in the business to be transacted.

The last hope of the completion of threshing before spring has faded in the past week. Continued cold and cloudy weather extending into December leaves some hope of a check that would melt the snow and dry the grain. It looks much as though we would experience the hardest winter in years to judge by the past month.

Sleighs are the popular method of transportation these days and wheat deliveries continue despite very difficult roads. Trucks and wagons have practically disappeared from the scene and it will be some time before they will come into general use again, even if favorable weather should prevail.

L.A. Bazaar Gratifying Success

The annual bazaar under the auspices of the Ladies' Aid of the Union Church was, as the ladies intended it should be, an outstanding success in every way. The church was located in Campbell's hall and from the beginning of the sale the building was crowded with eager purchasers with the result that sales were evidently satisfactory. Tea was served in a beautifully decorated booth in W. C. Hoskins' store and the tables were largely patronized throughout the afternoon for tea and also in the evening when supper was served.

The total receipts amounted to \$350.00, of which some \$71.00 was realized in the tea room. The following ladies were in charge; fancy work, Mrs. Wise and Mrs. McIntyre; home produce, Mrs. G. F. Smith; candy, Mrs. Caldwell; plain sewing and apron booth, Mrs. Manhard; tea room, Mrs. Campbell and Mrs. Freeze. The ladies wish to thank all who assisted in the work and also the numerous patrons who made the day such an unequalled success.

W. I. Members Please Note

The meeting of the W. I. will be held at the home of Mrs. Latiff on December 6th, instead of Dec. 20th, as stated elsewhere in this issue. Members and others are asked to take notice of this change of date and govern themselves accordingly.

Skating Ice Is Practically Ready

Rapid progress has been made with the skating rink and it is anticipated the ice will be ready for use this week. The curling sheets have also been receiving attention, but owing to the dilatory methods of the curling club, no meeting having been held as yet and no definite arrangements made, leaving the lessee in doubt as to just what amount of expense in making ice would be justified. It is hoped to remove this difficulty at an early date. In the meantime curling is in progress in adjacent towns.

The nomination of councillors for the Village will not take place this year. Recent changes in the village act puts this event in line with the municipal nominations in the new year.

Mrs. Walter Thornton of Green Bay, Wisconsin, and Miss Hannah Murphy of Wausau, Wis., sisters of Mr. Murphy, are the guests of Mr. and Mrs. J. W. Murphy, at the Savoy Hotel.

"I am the man!" She had marked with the scarlet letter of shame—but the name of the man she would not reveal—and then before the assembled thousands, he brandished himself. See "The Scarlet Letter."

Sleighs are the popular method of transportation these days and wheat deliveries continue despite very difficult roads. Trucks and wagons have practically disappeared from the scene and it will be some time before they will come into general use again, even if favorable weather should prevail.

NOTES AND COMMENT.

Every year when low grades of wheat prevail to a large extent the system of grading comes under a fire of criticism and downright abuse. While there may be individual instances where complaints are justified, much of the talk about unfair grading has no ground in fact. Canadian grades may be too high for commercial purposes as is contended in some quarters, but the system of grading in use has resulted in our wheat commanding the highest prices available. If this crop was grading No. 1 and No. 2 Northern it is very doubtful if the assertion that the grades are high in this country would receive a moment's consideration. As it is with low grade wheat so much is evident in the crop that we believe our whole system is wrong and that the grain interests are using their influence to secure the very low grades.

Tuesday night's experience introduces something which has fortunately been rare in Champion—burglary. While the losses were not extremely large it is not a comfortable feeling to think there are individuals around looking for an opportunity to break in and steal

anything they can get their hands on, although the parties responsible on this occasion showed a decided preference for money. It is to be hoped the guilty parties are located. A great many innocent people would be relieved of suspicion if the actual burglars were located.

Pool Handles Enormous
Quantity of Wheat

Out of 335,500,000 bushels of wheat inspected by the western inspection division for the crop year 1926-27, a total of 179,550,212 bushels, or 53.0 per cent was handled by the central selling agency of the wheat pool, according to the report of the president and directors of the central board, presented at the annual meeting of delegates of the Alberta Wheat Pool in Calgary during the past week. In the past year the pool shipped grain direct to 21 countries through 60 ports, exporting 107,802,000 bushels through Eastern Canada, and 16,333,308 bushels through western ports, the total amount exported amounting to 124,125,306 bushels. The net proceeds from the sales totalled \$232,030,969.65.

Wheat Pool Directors
Practically All Re-elected

Directors of the Alberta Wheat Pool with one exception were re-elected at the annual meeting of Pool Delegates at Calgary last week. The exception is in the north. The delegate from the northern district who had been director has gone to London, England, with D. L. Smith of Winnipeg, to open the old country office of the central selling agency, and the election in this district was deferred. Directors re-elected were: Edmonton, George Bennett, Camrose, Lew Hutchinson, Red Deer, H. W. Wood, South Calgary, Ben Plumer, Claresholm,

J. Strang, and Lethbridge C. Jensen.

For the sixth successive time John Gide of Killam has been unanimously chosen head of the Alberta Association of Municipal Districts at the recently concluded annual convention of the association held in Edmonton. Harry W. Bright of Macleod was also re-elected vice-president by unanimous vote.

The main beam in the new Wheat Pool elevator gave way this week and a gang is now on the spot making the necessary repairs. It is expected there will be but little delay in receiving wheat.

Local and General

J. W. Murphy attended the Hotel Men's convention in Calgary on Tuesday and Wednesday.

She was guilty of love!—and they marked her with the brand of shame. See "The Scandal Letter."

W. Willis leaves during the next few days for England, where he will spend the winter. Everyone will wish him bon voyage.

The Ladies' Aid will meet in the church on Thursday, December 8th, at 2:30. The year's business will be balanced up at this meeting.

Oscar Castor left for Vancouver recently, where he will visit his sister, Mrs. W. S. Gorsch.

D. W. Harper and E. Siler have joined a party from Brant on a moose hunt in the Edmonton district. They expect to spend several days on the trip.

Mrs. Wise wishes to thank the ladies who helped her in handing the fancy work booth and those who made donations. The booth realized \$26.00.

Much interest is being developed in the annual recital of Miss Wilson's pupils, which takes place under the auspices of the Women's Institute in Campbell's hall on Thursday evening, Dec. 1st.

COMMUNICATION

SCHOOL AND RINK

Editor Chronicle,
Champion, Alberta.
Dear Sir:

May I have space in your valuable paper to bring before the people of this district a matter which concerns us all.

The advent of the Christmas tests and the opening of the local rink seem to indicate a conflict of interests to our boys and girls. The Christmas tests are designed partly to stimulate the students to make a careful review of the work already covered, and I am sure the opening of the rink is primarily in the interest of their health. It seems to me, however, that the school is a happy medium between work and play to give the best satisfactory results.

Our increased standards of education demand an increased effort on the part of the students. I do not believe it is possible for a High School boy or girl to state that he or she is educated, even though he or she has done his or her best in school the next day. If skating is indulged in, in the evening, the homework should be done first. However, it is the parents' duty for individual parents to decide after they have given it careful consideration.

In regard to the public school, the teachers are unanimous in the opinion that small children are sleepy and are

not capable of doing good work if they have been skating the night before.

At a meeting of the teachers held Monday afternoon, the 28th, instead of the usual school on Tuesday, it was decided to offer the following program:

"We the teachers of the Champion School, wish to recommend to the manager of the rink and to the parents of this district, that children under fifteen years of age be not allowed on the rink after school on Monday, Tuesday, Wednesday and Thursday evenings.

We also recommend that a bell be rung to warn the children to get off the ice, and that lighting in the waiting room be increased.

(Signed) E. Catharine Burchy,

The

NEW CAR

ALL THAT engineers have learned, all that millions of owners have experienced, and a quality of craftsmanship which have made possible this car which is today far ahead of its time as was the famous Model T in 1905.

Sixteen million automobiles, serving their owners in jungle and desert, on mountain and plain, on boulevard and in the city, in the most severe weather, were the test which have made this new automobile possible.

It is a new epoch in automotive engineering in point of built-in quality—niches of mechanical design, lavish use of the finer metals, precision and delicate machining processes.

Nowhere in its construction has there

been slighting of either major essentials or minor details. From its exterior to its interior, from its outermost bearing, the new Ford car epitomizes engineering skill to a degree unexcelled in the annals of motor car manufacture.

This entirely new car surpasses the accepted standards of light car advertising, and in its price, which is in the middle of price class, establishes a new standard of acceleration, speed, power and smoothness that heretofore has marked only expensive cars as fine cars.

Yet Ford precision in large scale production, unparalleled in the history of automotive manufacture, places this car within the reach of every purse.

An advance showing of the New Ford Car will be made Friday, December 2nd, in the following cities:

HALIFAX	PETERBORO	WINNIPEG	ST. JOHN	TORONTO
REGINA	QUEBEC	MONTREAL	SATURNIA	SHERBROOKE
BRANTFORD	MOOSE JAW	MONTREAL	LONDON	CALGARY
OTTAWA	WINDSOR	EDMONTON	KITCHENER	FT. WILLIAM
			VANCOUVER	VICTORIA

As rapidly as increasing production permits these public showings will be extended until all of the 700 Ford dealer points have been covered.

If you live in one of the cities listed above, visit the exhibit of this New Car.

At other points, call your local dealer next Friday. He will give you complete

specifications, prices and an excellent conception of its unusual features.

FORD MOTOR COMPANY OF CANADA, LIMITED, FORD, ONTARIO

SERVICE GARAGE, Dealers, Champion.

Old Prophecy Deciphered

Medieval Magician Predicts Disappearance Of Britain In 3422

He was born with the year 3422 and British with disappear beneath the waves that she has ruled so long, according to a prophecy of the medieval magician Nostradamus, that has been deciphered by the American.

The destruction of Parks will be accomplished by "air vessels" that will hover over the city dropping death and annihilation, says the ancient prophecy. Nostradamus predicted the French Revolution and two hundred and fifty years later the assassination of Louis XVI, he described with the most minute details the clothes the King would wear when he was to mount the scaffold.

Nostradamus presented his prophecies to Catherine de Medici. The cipher appears to have told a consecutive story, harmless and innocuous. Now that the key has been found, a deeper meaning has been discovered.

atation, but it was hard to keep from looking at Jack. His face flushed out as clear among the gray faces around him as a rose in a field of yellow "finestard." It never got any fresher. He asked her to go with him to a dance one Saturday night at the hotel, and although she wanted to go, for she loved him, he was some percentage of what she deserved.

"Plan, you're too tired," Jack said. "You should take the train as you are. It's the only way to get any." But Mrs. McMann counseled Hulm with telling her the men would think all the more of her if she went. "It's the last chance she got to go to a dance. Mrs. McMann quoted many instances in her own past life to prove it. "The seldom seen was the most abundant," she said, "was a safe rule for any girl. Hulm had to get away from the hotel, and she did. She wrote a long letter to her sister Anna in Finland, and put a five-dollar bill in the letter for her grandmother, and tried to feel she was a good girl to stay away from the hotel.

Mrs. McMann told the other women that she was glad to be able to see Hulm that she knew how to keep the men in their places; how when Bill Larsen, the bartender, who was a good fellow, too, had tried to get away with her, she said, "Bill, you're a good boy, but you're not a notion that women should be more than the time's trash or dregs!" It out. I tell her she's trying to show off the best men. She's got that old country idea that if you want to make a good impression you've got to have what a greater number you are. I think Hulm is trying to get the idea over to this young Jack Doran—but that's not the way to get next to a boy like Jack. Jack is clever enough to know what a good idea she has to make money and women need it."

Hulm had been scrubbing the upper part of the windows and taking no part in the conversation. Just at this time, she had lifted the cold steel of a long-handled brush to a hand-top on the top of the kitchen counter board, and found to the best of her knowledge an oyster of waxends, spoon, a set of false teeth, a candle, and a piece of soap. She had been so intent on what a great number you are, I think Hulm is trying to get the idea over to this young Jack Doran—but that's not the way to get next to a boy like Jack. Jack is clever enough to know what a good idea she has to make money and women need it."

To Be Continued.)

Sexant For Airplanes

Observer Enabled To Read Position Direct From Instrument

An aeronautic sextant, which according to its inventor, will make possible the finding of position from an airplane without lengthening the instrument, has been invented by H. R. Kastor, aeronautic professor of astronomy at the University of California, it is announced by college authorities at Berkeley.

The instrument is similar to a child sextant, but is much more accurate, and the necessary observations may be made directly from the instrument without further work. The advantage of this, it is explained, is to enable the aeronaut to find his position under clouds such as exist in clouds of mosquitoes or any small ships not equipped with chart rooms.

A committee of university professors has passed on the instrument and recommended that it be adopted by the government. W. W. Campbell, himself, has recommended the construction of an adequate work model, if the instrument fulfills expectations. The United States Government will then have the instrument especially fitted with steel to be sent to the government to continue these efforts on a more elaborate scale.

The aeronaut sextant will be placed in the cockpit of the plane, turned on and appropriate for receiving the signals wireless telephone messages. It will cruise for several weeks at sea while attempts will be made to contact the ship and land in both ways on the ocean.

Two months in frames of light wood, crossing at the corners under gold leaves, stared at each other across the room. On raised

platforms the men played chess on a tiny table. Hulm had been

the chessie, the other one gave

strange but definite answer, "Peace Perfect Peace." It was here that the men ate their meals, carried in on their trays, which Hulm handled with all the grace of the women of the East who carry their water-bottles on their heads.

After the meals were over, the tables cleared, the men played chess on a tiny table. Hulm had been the chessie, the other one gave strange but definite answer, "Peace Perfect Peace." It was here that the men ate their meals, carried in on their trays, which Hulm handled with all the grace of the women of the East who carry their water-bottles on their heads.

After the meals were over, the tables cleared, the men played chess on a tiny table. Hulm had been the chessie, the other one gave

strange but definite answer, "Peace Perfect Peace."

Women are preferred to men as

partner divers at Takoku, Japan, because it is claimed they can stay under water longer.

If you are poor your friends seldom

want to help themselves.

It's better to be ignorant of a secret that is dangerous to keep than it is to know it.

Medical Missionary

Returns To India

Seventy-Two-Year Old Woman Returns

to India

Although she has reached the age of 72, Dr. Anna S. Kugler, the first woman who ever became a missionary to India, was granted permission by the Board of Missions of the United Lutheran Church in America to return to India as superintendent of Guntur Hospital. She had been serving in India for 44 years.

Returning to America on Feb. 12, 1925, much broken in health, Dr. Kugler, then 75, was due to return during the past summer the urgent request that she be permitted to go.

During her stay in America, Dr. Kugler received individual gifts totaling more than \$3,000, which she declared were given to her to purchase new equipment for her hospital.

Dr. Kugler went to India in 1884, when even men medical missionaries were scarce. In 1894 she received from the Vicerey of India the silver certificate of medal in recognition of her services to the people of India. Six years later the Government again honored her by adding a bar to this medal.

Colonizing the West

40 Families Are Placed on 110,633 Acres Of Land in Western Provinces

During the first nine months of the present calendar year the Canada Colonization Association placed 464 families on 110,633 acres of land in the west. There were 322 families in Manitoba on 26,810 acres; 175 families in Saskatchewan on 59,815 acres; 141 in Alberta on 52,421 acres, and 15 in British Columbia on 2,581 acres. The Association is a unit of the Canadian Pacific Railway Department of Colonization and Development.

FOR MOTHERS OF YOUNG CHILDREN

Little Helps For This Week

"It don't yet appear what we shall be,"—John III. 2.

Have we not all, and life's pretty strict?

How come plenty of noble life?

That once seemed possible? Did we

not hear of its wings, and feel

that just within our reach? We

lost it in this day and night, and now life's still kept, and it will wait.

Ready for us to fill it soon or late,

we have no place to keep, and it will wait.

There is no joy, there is no longing,

there is no glory of living or acting,

no supreme moment you can picture

in your dreams, that is not in life.

As God does it, it's stirring in the

heart, but it's hard of late, waiting

for you in a gloomy rut, that shall be there?—Adeline D. T. Whiting.

Certain mordant conditions must exist in the stomach and intestines to allow the growth of intestinal worms, as long as these mordant conditions persist there is to be rid of them by the use of the new and safe Baby's Own Worm Powders. They will correct the wormy condition by removing the worms from the intestinal walls, the worms will disappear, and the child will have no more suffering from that cause.

Rule Over Jungle Capital

King Of French Protectorate Lived In Lavish Luxury

Twenty years ago a king stood on a balcony of a hotel in Marseilles and said: "I have no place to go but to the jungle." That was the beginning of the 60th and the 141st degrees of longitude. This large area is now known as the Arctic Islands Preserve.

The area of wild life preserves set aside for the benefit of natives by the Department of the Interior, in the Northwest Territories, Canada, has increased from 1,000,000 acres to 1,000,000 acres in the last 10 years.

The Arctic Islands Preserve is

located in the Arctic Islands.

Long Standing Asteria. Many have

tried so long from asthma and have

tried so many so-called remedies that they find in the old help.

The shrub, a native of the Arctic, is

received by the manufacturers of Dr.

D. T. Whiting, who imports from

hundreds of cases and deems

as their own. Even in long neglected

cases this famous preparation brings prompt relief.

We hope the firms which sell exhaus-

tions on the market are very

prompt about taking them back when

the installments fall behind.

Feldspar Mined Since 1850

Feldspar has been mined in Canada

since 1850, the greater part of the out-

put being sent to the United States.

The feldspar industry in the

states is very large.

The feldspar is used in the

potteries of New Jersey and Ohio and

in the enameling trades.

Long Standing Asteria. Many have

EXPORT WHEAT QUALITY LOWER THAN FORMERLY

Calgary.—The quality of Canada's export wheat has dropped considerably in the last 15 years because certain sections of the west are showing definite signs of wearing out, the Alberta Wheat Pool convention was told by Chief Inspector J. D. Fraser of the Grain Inspection Commissioners of Canada, Winnipeg.

"With so many grades developed," Mr. Fraser stated in answer to a question from one of the delegates, "certain sections of the West are showing definite signs of wear out."

The question, fired at the chief inspector at the conclusion of his address to "Some Points of Grain Grading," as to whether the West should be tightening up of grades.

Mr. Fraser was definite in his reply that in grades one, two and three, the quality of wheat delivered was not nearly as good as it was in 1913. The different kinds of wheat were becoming polluted, he declared.

Scenes of other operations were related upon the speaker and in reply to one of these he stated that grain inspectors would be given the right to demand the benefit of any sample that may arise in grading samples. He advised the delegates to send their wheat in for inspection securely packed in canisters. Not so much attention, he said, was paid to samples when they were sent in, and a good sample could be obtained by following this advice and by enclosing a dollar bill to cover the cost.

Refusing to touch wheat, Mr. Fraser stated that a limit of 100,000 bushels had been set by Dr. Birkhead, Dominion chemist. There was danger when the moisture ran above this mark.

After a short set of questions of wheat at this stage, the inspector said if there were adequate facilities for immediate drying, threshing could be undertaken in safety; otherwise it would be better to let the grain stand in the open air for a while. The investigator made comments to the effect that inspectors were apt to forget the farmers' side of the question and that carelessness in handling grain had been experienced. Mr. Fraser's comments, in the argument that followed, a delegate declared the complaints were amply justified by the fact that a number of poor ears had been raised in grade following a protest from pool headquarters.

Mr. Fraser came back with the reply that grading was in any event a matter of opinion and that no two ears of grain graded up exactly alike.

Birth Rate Is Lower

Ottawa.—In every province with the exception of Quebec, Canada's birth rate is shown. Figures for last May were issued by the Bureau of Statistics recently and gave the Dominion a birth rate of 28.4 per 1,000 of the population as of May 1 for any year. Quebec's rate of 34.0 is slightly above the previous May. This was the highest in the Dominion. New Brunswick had the next highest rate with 36.3, compared with 27.7 for May last year.

Horseshoe Pitching Contest
Toronto.—An attraction on the official program occurred during the horse show pitching contests at the Royal Winter Fair when H. G. Ross, of Peterborough, Ontario, challenged Hon. W. D. Ross, Lieutenant-Governor to a match. Stripping off their tail coats, the premier and Lieutenant-Governor played two games to the greatest enjoyment of those present. Mr. Ferguson lost.

ominated Labor Candidates
London.—Reginald Francis Orland Birkhead, embryo candidate in His Majesty's service, has been nominated as Labor candidate for the Etobicoke constituency. He is a cousin of Victoria Lannigan, Princess Mary's husband and a cousin of W. C. Birkhead, first lord of the Admiralty.

New Zealand Butter For Canada
Auckland, N.Z.—The Niagara has sailed with 20,000 boxes of butter for Vancouver, this being the largest Canadian shipment so far recorded. The vessel has also 1,870 boxes for Honolulu, and 1,960 boxes for Shanghai. The Niagara is due in Vancouver December 9.

Chinese Bar War Film
Harbin, Manchuria.—Chinese authorities have denied reports that the mud pictures "The Bar Parade" after a protest from the German government. He claimed the film was unsafe for Germany.

Survey Homesteads Along Bay Railway

Some Quarter Sections Now Open For Entry Says Minister Of

Ottawa.—Homesteading facilities in the territory adjacent to the Hudson's Bay Railway and the progress of the surveys in that country were outlined by Hon. C. E. Stewart, Minister of the Interior and Mines.

The Minister said: "From time to time during the past few years various officers of both the departments have conducted surveys made investigating and carried out in the territory adjacent to the Hudson's Bay Railway. Lands immediately adjacent to the railway from the Pas to Mile 221 have already been surveyed into quarter sections and are now open for homestead entry."

Data of considerable worth has been secured respecting the location, extent and value of agricultural lands, timber, water power, and mineral deposits.

Land and mineral surveys have been projected over much of the region and active progress has been made in mapping the area more completely.

Scenes of other operations were related upon the speaker and in reply to one of these he stated that grain inspectors would be given the right to demand the benefit of any sample that may arise in grading samples. He advised the delegates to send their wheat in for inspection securely packed in canisters. Not so much attention, he said, was paid to samples when they were sent in, and a good sample could be obtained by following this advice and by enclosing a dollar bill to cover the cost.

Mr. Fraser came back with the reply that grading was in any event a matter of opinion and that no two ears of grain graded up exactly alike.

Ship For Canadian Trade

Lower Laurentian Was Built Especially For This Purpose

Now in the water in the Dominion of Canada was expressed by C. V. Mitchell, vice-president for traffic of the International Mercantile Marine, at a banquet held on the new White Star Liner Laurentic, to mark her entry into the service.

The Laurentic, Mr. Mitchell said, had been built expressly for the Canadian trade, because the White Star Line believed in Canada, her present greatness and her future. The Laurentic will take her place in the Canadian trade next spring.

Women and the Senate

Toronto.—It was then women were recognized by appointment to the Senate, according to the Ontario Women's Liberal Association executive meeting here. Miss urged that women logically should have a place on the Senate's committee on social welfare, the diverse and public health committee.

Hon. J. B. Almy, of the Borden, Manitoba Department of Agriculture, said J. H. Evans, minister of agriculture for Manitoba, submitted on the fact that Manitoba grown wheat had won the coveted award.

"Winning of the highest honors is all the more remarkable an achievement when we consider that this has been a somewhat 'off year' for wheat in this province," said Mr. Evans.

Mr. Evans is looking forward to Manitoba grown wheat giving a fine account of itself at the International fair at Chicago.

"Winning of the highest honors is all the more remarkable an achievement when we consider that this has been a somewhat 'off year' for wheat in this province," said Mr. Evans.

Orders Coronation Robes

War Lord Preparing To Crown Himself Emperor Of China

London.—A despatch from the Evening News from Tokyo says that Japanese correspondents at Peking report that the Northern generalissimo, Ching Tso-Lin, is now preparing abdication to crown himself emperor.

Coronation robes have been ordered from Soo-Choo, where the best silk is obtainable.

The Manchurian chieftain, who has been Northern generalissimo, will proclaim himself the new mountain emperor. He will rename China "the mighty empire."

The throne of China became vacant on January 1, 1912, when the country became a republic. Since then the last Manchu emperor, P'u Yi, retained the title of Emperor of the Manchu Imperial House up to November 5, 1924.

Hazing Is Punished

Freshman Class Of Guelph Agricultural College Is Fined

Guelph, Ontario.—The Ontario Agricultural College faculty assembled to hear the complaint against the fresh man class for hazing Edward Biddle, a young English student of the class.

By decision of the faculty and student body, the class was fined \$100 and ordered to have a public apology made every night with the exception of one night each week, for the balance of the term. An apology from the class must also be given to the offended student.

The hazing of Biddle was an attempt, it is said, on the part of his fellow class mates of the freshman year to inflict student justice on the young fellow for "equaling to the authorities over some minor matter."

**REWARD WHEAT
BRINGS HONORS
TO MANITOBA**

Winnipeg.—Representatives of the Manitoba Department of Agriculture and of the Manitoba Agricultural College declined to comment on the results of the competition for the grand championship entry in Reward wheat at the Royal Winter Fair, Toronto, which was unauthorized.

The Government disputes the allegation that the cheque was signed by the British Crown.

Eastern Presses Dispute the Allegation

Winnipeg.—Representatives of the Manitoba Department of Agriculture and of the Manitoba Agricultural College declined to comment on the results of the competition for the grand championship entry in Reward wheat at the Royal Winter Fair, Toronto, which was unauthorized.

After a short set of questions of wheat at this stage, the inspector said if there were adequate facilities for immediate drying, threshing could be undertaken in safety; otherwise it would be better to let the grain stand in the open air for a while. The investigator made comments to the effect that inspectors were apt to forget the farmers' side of the question and that carelessness in handling grain had been experienced. Mr. Fraser's comments, in the argument that followed, a delegate declared the complaints were amply justified by the fact that a number of poor ears had been raised in grade following a protest from pool headquarters.

Mr. Fraser came back with the reply that grading was in any event a matter of opinion and that no two ears of grain graded up exactly alike.

Refused To Meet Miners

Premier Baldwin Declined Interview With Deputation From Wales

Toronto.—Premier Stanley Baldwin was threatened by an announcement that the miners would refuse to vote a deputation to see the Minister of Mines.

Mr. Baldwin referred to the request of the miners for an audience to the Minister of Health, Labor, Pensions and Mines.

Although disappointed, leaders of the miners' union said the miners' march was achieved as the march focused public attention on the mining situation. The men held a farewell demonstration at Trafalgar Square, and then entrained for Wales.

Navigation Season Near End

Montreal.—Despite the fact that the St. Lawrence navigation season is rapidly drawing to a close, there are 12 more days of traffic on the river for which grain orders have been in the Montreal harbor commission. All these vessels are now loading or due to load.

It is probable that the orders will be increased with open weather being maintained on the St. Lawrence.

Pays Over Fifty-Two Millions

Toronto.—The Alberta Wheat Pool handled a total of close to \$4,000,000 worth of grain in the period from July 1 to October 1, 1925, the amount presented in the bundles of wheat from the 1925 crop annual meeting of the pool.

The total amount of payments to farmers, it was stated, was \$2,564,000.00.

Corn From The Argentine

Port Arthur.—A shipment of 4,000 bushels of corn from the Argentine was loaded into the freight train at St. Pauls, Minn., en route to the port of St. Paul, Minn.

It was stated in the manufacture of

the Argentine corn to be carried to the Head of the Lakes for manufacture.

Winter Mail For Dawson City

Dawson City.—The Queen of the Yukon, a sister to Lindbergh's "Spirit of St. Louis," will this winter carry the mail into Canada's most northerly metropolis.

**Watch the
Advertisements**

Everyone of them has a real message for you.

The "Want" column, too, is well worth looking over regularly. There is always something lost, found or for sale that will interest you. And when answering advertisers don't forget to say you saw it in

THE CHRONICLE

Perhaps the largest individual shipment of turkeys and fowl ever shipped out of Champion by a private rancher, when C. H. Sutton shipped through Campbell's over 2300 lbs. of turkeys and chickens. These went direct to the Swift Canadian Co., whom Campbell's represent in Champion and they state they are open to buy all kinds of dressed or live poultry from Nov. on.

Special Service
Sunday, December 4

In the United Church on Sunday evening, December 4th, the pastor will give a recital of Wordsworth's "Michael." The poet tells us that the story is founded upon pathetic incidents in the home life of a family who have lived in a house which Wordsworth later occupied.

Students of the Consolidated School are heartily invited, with all the people of the community, to attend this service, which is especially planned for young people.

Sunday evening, December 11th, being the eighteenth anniversary of the first automobile purchased by the pastor, when he was eighteen years old, will be given again from the same text as he used on that occasion.

A Wail From the School

Mr. Baker is my shepherd and I am in dire want; he preventeth me from lying down in the bed which I treath, he leadeth me to distraction with his physics questions.

He, yea and also Miss Barclay, both shaketh my desire to win high school degrees. They leadeth me to make a degree of a high school boy, by means of remarks such as "Stay 'til it's finished," or "You only obtain the class with your continual chatter."

Yea, though I use light to the extent of 40 kilowatts per 24 hours, I fear not evil for they are plotters against me.

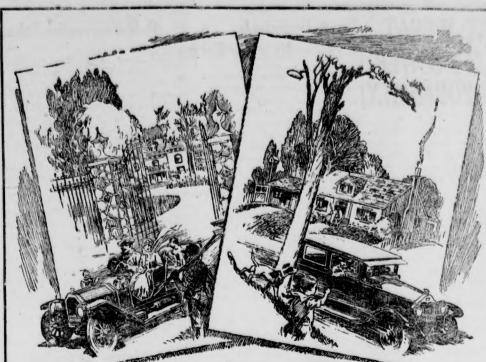

His riflings; her ravings; and the theories of both of them drive the last grain, ay atom, of freedom from me. I fear not evil for they are plotters against me.

They assigneth me extra work and for punishment they filleth my book with red marks and zeros run over the edges of the paper.

Simply Master, Baker, Crawford and Smith will follow me through all the days of my high school life after which I shall dwell in the bughouse forever.

I have a buyer for 160 acres of land within eight miles east of Champion.

A. W. JOPLING

**Luxuries Once
But Necessities Now**

PRACTICALLY any Canadian citizen may today own an automobile possessing elements of beauty, style and efficiency which no amount of wealth could have commanded a dozen years ago.

For the automobile industry has outgrown its original limitations as a pioneer of transportation and is in an amazingly short time, brought about the refinements which are exemplified in the present-day General Motors car.

Since its foundations first were laid sixty years ago, this institution has believed that every Canadian has a right to the best his country produces, has a right to satisfy his sense

of beauty, his desire for comfort, his need for dependability.

General Motors has at its command the minds of the industry. It has the finest automotive research laboratories and the greatest automobile proving grounds in the world, which have been carefully planned and developed some of the industry's most revolutionary advances.

And General Motors has used its proper power and energy in unceasingly in improving the quality and increasing the value of its products.

It is thus that General Motors of Canada has played its part in transforming once-inconceivable luxury into terms of every-day necessity.

1928 RADIO MODELS
BY WESTINGHOUSE

Have These Notable Advantages and Improvements

A. C. Batteryless Sets:
Operate on either 25 or 60 cycle alternating current. This is a big advantage when you move where there is no current A. C. supply.

Designed to use new Westinghouse A. C. Radiotrons, UX-216 and UX-217, which operate on 25 or 60 cycle alternating current through a step-down transformer in the "A. C." These Radiotrons are also built in "A. C." sets. These have been the chief disadvantage of many types of A. C. Batteryless sets in the past. The UX-112 Power Tube is employed for lead speaker operation.

Battery Operated Sets:
Designed to operate with "A" Autopower and Eliminator Units—or batteries, without radio tubes or transformer.

Designed to use the new Westinghouse Radiotrons UX-201-B requiring half the "A" current of the UX-216 and UX-217. This has been universally adopted by radio manufacturers the past. Owners of previous Westinghouse sets will be greatly pleased by having their Westinghouse Dealer attend to the re-motorization and installation of these sets at a cost of \$3.35 up, plus express charges.

Five of the Battery Operated Batteryless Sets are made in Five and Six Tube Models. These are designed for 25 cycle alternating current and can be used with the UX-216 and UX-217. These sets are absolutely non-resonating and cannot interfere with the radio sets.

Single control station selector, of the drums type are used in all models for best signal reception. The UX-216 and UX-217 are all console models. This Westinghouse achievement receives with isolator, Volume and tone controls, and a speaker. The UX-201-B is a cabinet model. This Westinghouse cabinet is built without distortion or blunting. All Westinghouse cabinets are finished in a light, warm, tan color.

Prices of the "A. C." Batteryless sets from \$235.00 to \$285.00 complete.

Prices of the Battery Operated Sets from \$78.00 to \$180.00 without accessories.
